

# Sage Diaper

## Care and Use for One Step™ diaper system

Diagram 1

Front snap rise on largest setting

Front snap rise on middle setting

Diagram 2

Close Up of Snap It™ diaper and One Step™ cover

Diagram 3

1) This is what our One Step™ cover looks like when it is closed. It has snaps on the front rise that adjust to fit your baby as they grow. (diagram 1)

2) Open cover & just snap in our Snap It™ diaper and you're ready to go. If you are using an Easy Fold diaper (prefold diaper) just fold in thirds and lay down the center of the cover. Place under your baby, and stretch them a bit as you pull it up between their legs to the front. Fasten cover closed with the hook and loop. (diagram 2)

3) If your baby has a small waist, you can fasten the hook to the extra loop tab on the side (diagram 3)

4) Our Snap It™ diapers come in two sizes. Size 1 fits Newborn to Medium. Size 2 from Medium thru X- Large.

5) The One Step™ cover may be used for multiple diaper changes. When the diaper is wet simply snap in a fresh one. If the cover is wet, allow to air dry and use for the next diaper change. When the cover is soiled or very saturated, start fresh with a new cover.

For added absorbency, place a Diaper Doubler between the 2 layers of the Snap It™ diaper at nighttime.

### Laundering

**Important : Please remember to fold the hook securely onto the laundry tabs before laundering - this prevents hook from snagging fabric.**

**Wash warm, gentle cycle, dry low or hang to dry. No chlorine bleach or oxyclean. Non chlorine bleach only when needed. Do not iron.**

**Diapers must be washed before first use** so that they are absorbent. Hemp-Organic Snap It™ diapers will require several washings. (see laundering instructions)
